“

Each session
has been
a journey of
discovery, not only
for the students but
for myself as well

*Celestina Atom,
Brilliant Club tutor*

”

What impact will I have on pupils?

You can make a real difference to young peoples' lives. We know that Scholars Programme graduates achieve higher GCSE scores than students who have similar prior attainment.

Evidence also shows us that Scholars Programme graduates are more likely to apply and progress to a competitive university than students from similar backgrounds.

How does The Scholars Programme work?

Our tutors are matched with a school to deliver 7 in-school tutorials to a group of 14 pupils.

How will this benefit me?

You will gain valuable pedagogical and research communication experience, by delivering courses based on cutting-edge research. This can either be through a pre-designed programme, or one you design based on your research.

What support will I receive?

This is a **paid opportunity** and we are a living wage employer. You will receive extensive training to ensure you are ready for your placements and support from the Brilliant Club team throughout.

The public speaking and pedagogical skills I developed through the Programme will benefit my academic career and the personal confidence I gained will be beneficial when applying myself to new challenges in the future.
